

Glenn Matthias

I would like to apply for the breeding health and welfare commission. I have been showing and breeding Norwegian Forest cats for about 14 years I have had cats most of my life.

In that time i have had several litters all of which luckily have been healthy and some have also done very well in shows. I have always done my best to ensure they are healthy and happy and the ones that went to new forever homes would be well cared for. I have been a member of the Viking cat club for most of my time owning Norwegians

Previously I did some time on the show commission for this club if I'm accepted I am happy to accept a position for either 2 or 3 years whichever the commission feels would be suitable.
